

I not only fully support the do not call registry, but I am also on the registry list. I also thing that radio and tv stations should be on the list, as well as surveys. These calls are not wanted, and seeing that this is our phones, we should be able to stop them. Although these companies say that they have the right to free speach, they should not have the right to force there rights,opinions,or anything else on anyone else. Furthuremore the Do Not Call registry is like placing a sign on your building that says no soliciting, which is very much legal. The phones they call are private property, and we have a right to govern that property as we see fit.

Thank You.
